

## Valve Applications Engineer (Internal Sales) – Join the Experts in Process Control

With over three decades of industry excellence, Multiplex is a trusted name in providing aftermarket service and repair solutions across the UK. As a major partner and UK stockist for global leaders like Baker Hughes, Schneider Electric, REXA and more. We operate across diverse sectors including Power, Gas networks, Refining, Chemical, Offshore Oil & Gas, Energy from Waste & more.

Location: Chesterfield (Hybrid options available)

Department: Internal Sales

Reports to: Sales Director

Package: Excellent salary + company benefits + bonus + training

### The Opportunity

We're seeking a **Valve Applications Engineer** to join our dynamic sales team. This is a critical technical role where you'll be the bridge between **engineering, sales, our valued customers & suppliers**. From selecting and sizing valves to offering technical support across the lifecycle of a project – your expertise will make an impact.

### Key Responsibilities

- Analyse customer specifications and process data to select and size control valves/actuators
- Process enquiries, generate quotations, and manage orders
- Interpret P&IDs, process flow diagrams, and control philosophies
- Provide responsive technical support and application advice
- Stay updated on **ISA, API, ASME** standards and new technologies

### Your Skillset

- Degree or HND/HNC in Mechanical or Automation Engineering (desirable)
- 5+ years' experience in control valve applications or technical support
- Strong understanding of **fluid dynamics** and valve sizing tools
- Experience with **Safety Relief and Severe Service Valves** (a plus)
- Familiarity with Oil & Gas, Power, Chemical industry practices
- Excellent communication, problem-solving, and multitasking skills
- Proficiency in MS Office; experience with ERP systems

### What We Offer

- Competitive salary based on experience
- Performance-based sales bonus
- Hybrid working opportunities

- Ongoing **training, development, and growth potential**
- Be part of a **dedicated service team**, trained to factory standards

**Ready to join a leader in industrial automation and aftermarket solutions?** Apply today and be part of our mission to deliver best-in-class process control solutions across the UK.
